

# Overview

## Category: PBS on Columbia

### DRAFT

This article is being reviewed for completeness and technical accuracy.

On Columbia, PBS (version 9.2) is used to manage batch jobs that run on the four compute systems (Columbia21-24). PBS features that are common to all NAS systems are described in other articles. Read the following articles for Columbia-specific PBS information:

- [queue structure](#)
- [resource request examples](#)
- [default variables set by PBS](#)
- [sample PBS scripts](#)
